Web-Devolepment-Activity-Based-Learning

Selected Test Cases

1. Personal Portfolio Website
2. Bakery and Cake Shop Website
3. Online Learning Platform Interface

Name: Kotagiri Thrinisha

Roll no: 26001087

Branch: CSM

Section: 4

Test Case 1: Personal Portfolio Website

Aim

To design a personal portfolio web page that introduces the student, shows education, skills, hobbies and contact details in one place.

Description

A single-page portfolio titled "My Personal Portfolio". It has a navy header, a bordered profile photo, and a white navigation bar with links to About, Education, Skills, Hobbies and Contact. The sections are centre-aligned on a light blue background and the page ends with a navy footer.

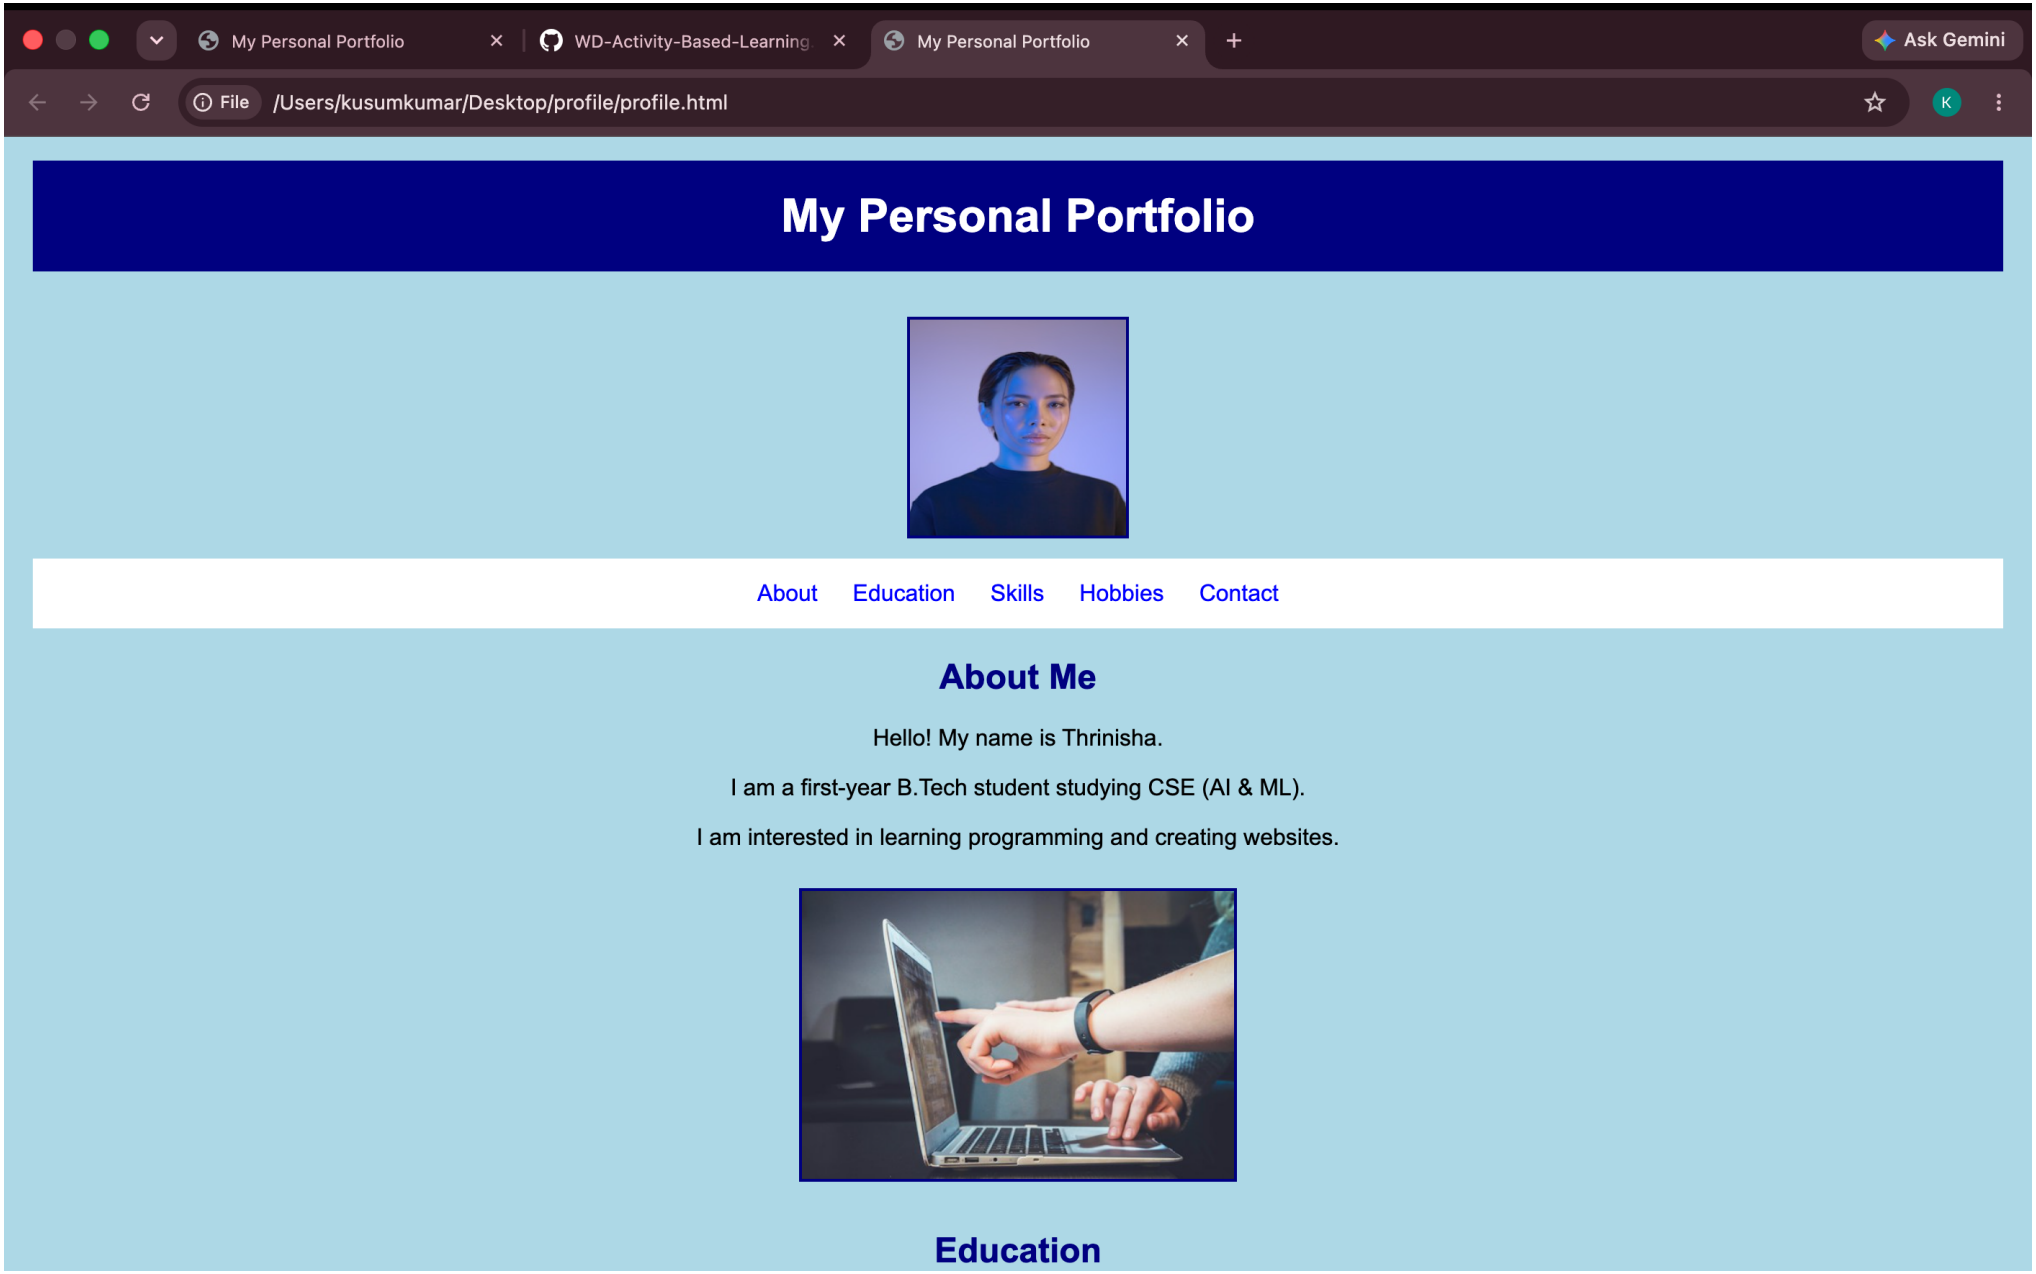

Features

- About Me: introduction as a first-year B.Tech CSE (AI & ML) student interested in programming and creating websites, with an image
- Education: B.Tech - CSE (AI & ML) and Intermediate - Narayana Junior College, Bhavanipuram
- My Skills: HTML, CSS, Python and C Programming shown as a list beside an image
- My Hobbies: learning new things, coding and exploring technology
- Contact Me: email address and a copyright footer

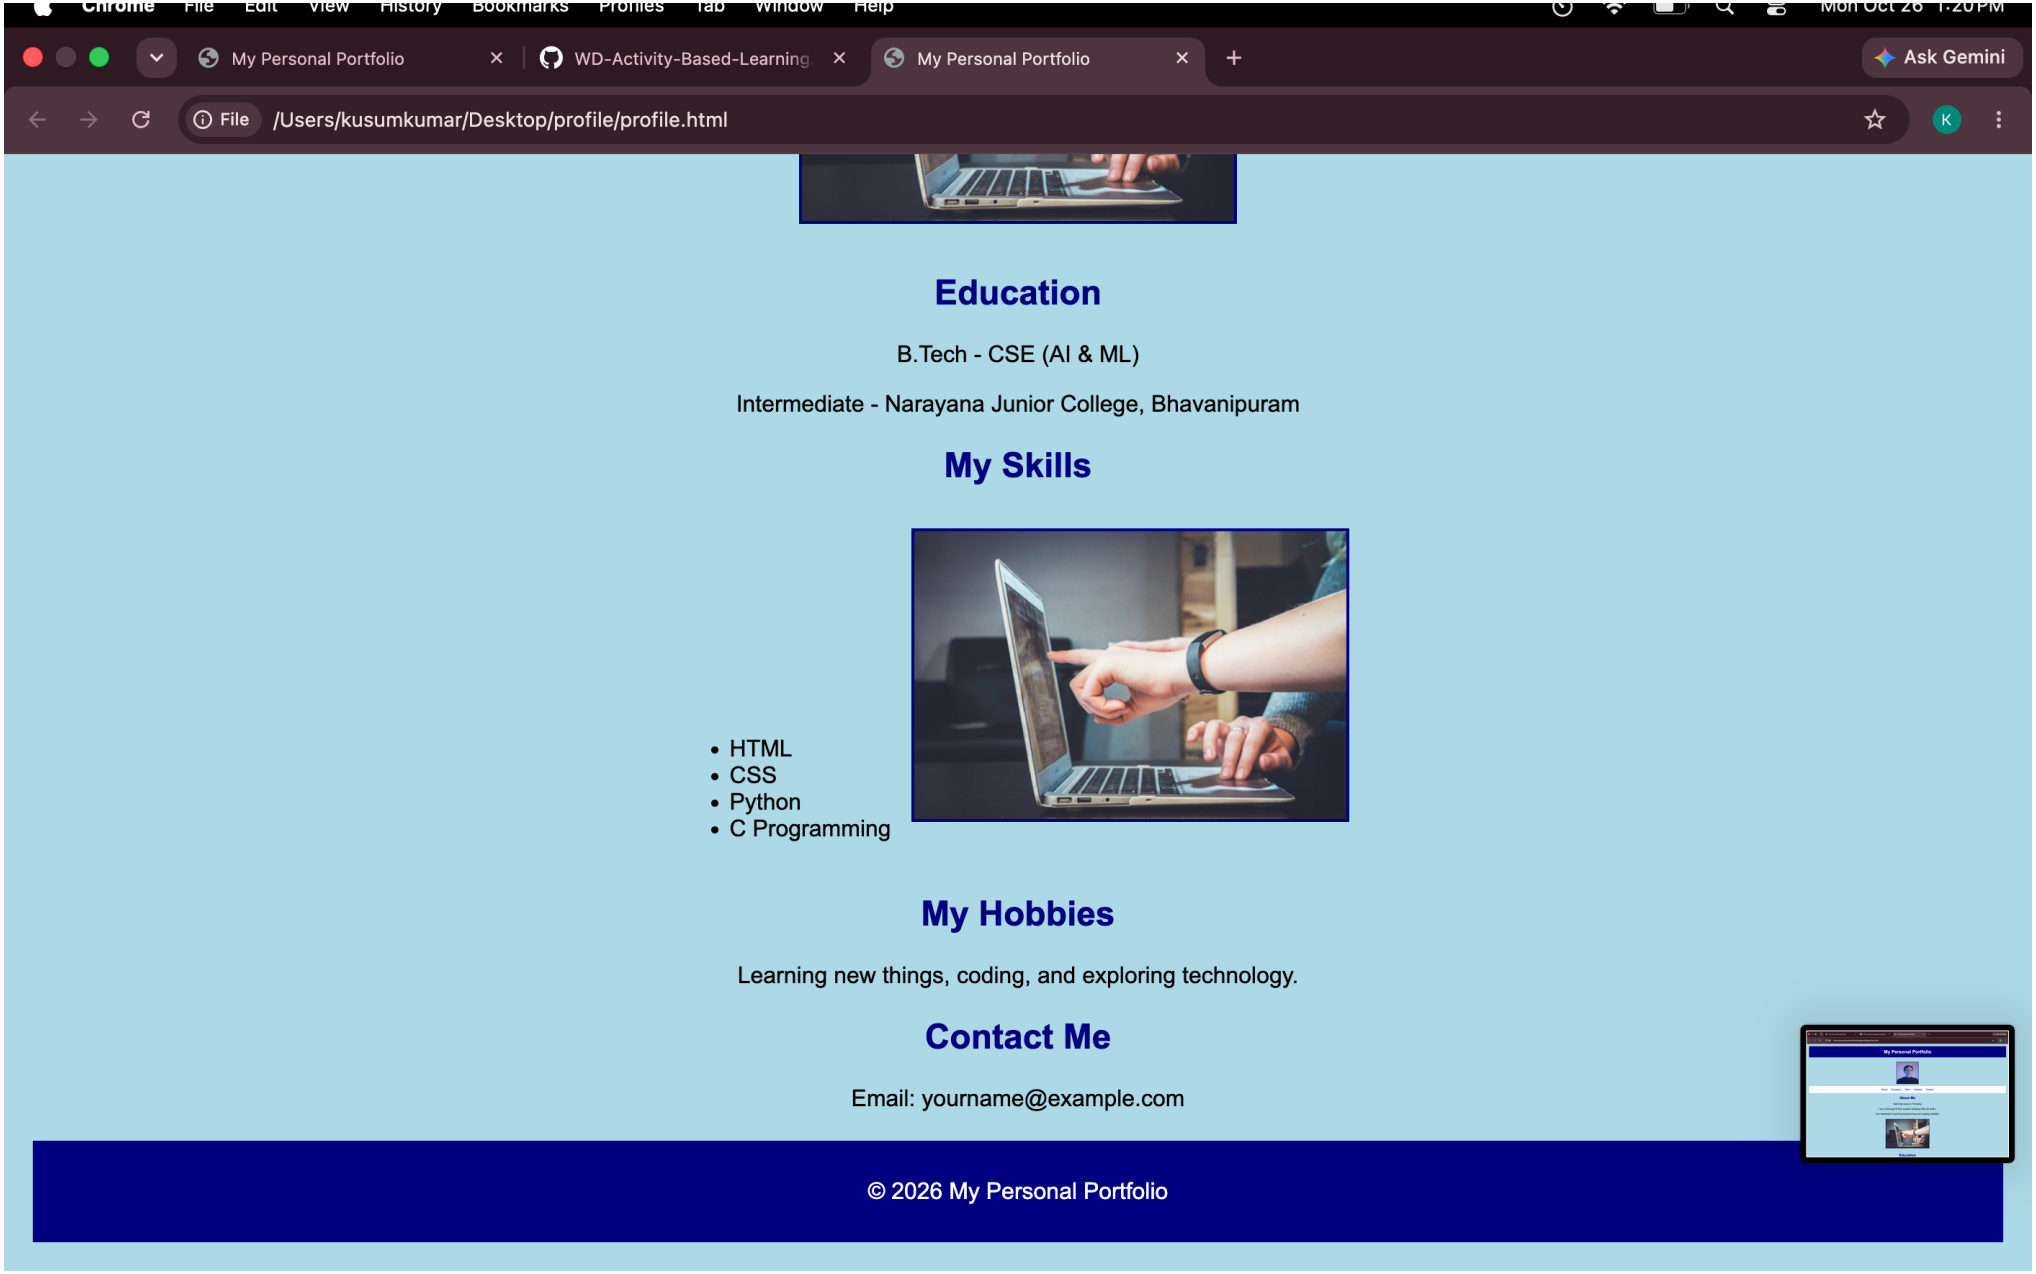

Technologies Used

HTML (headings, paragraphs, images, lists, navigation links) and CSS (background colours, borders, alignment, layout).

Test Case 1: Personal Portfolio Website - Output

Test Case 1: Personal Portfolio Website - Output

Test Case 2: Bakery and Cake Shop Website

Aim

To create a simple website for a bakery that displays its products with prices, a special offer and contact information.

Description

A web page titled "Sweet Cake Bakery" with a red header, a pink navigation bar (Home, Products, Contact) and a cream background. Products are shown as three white cards, each with an image, name and price.

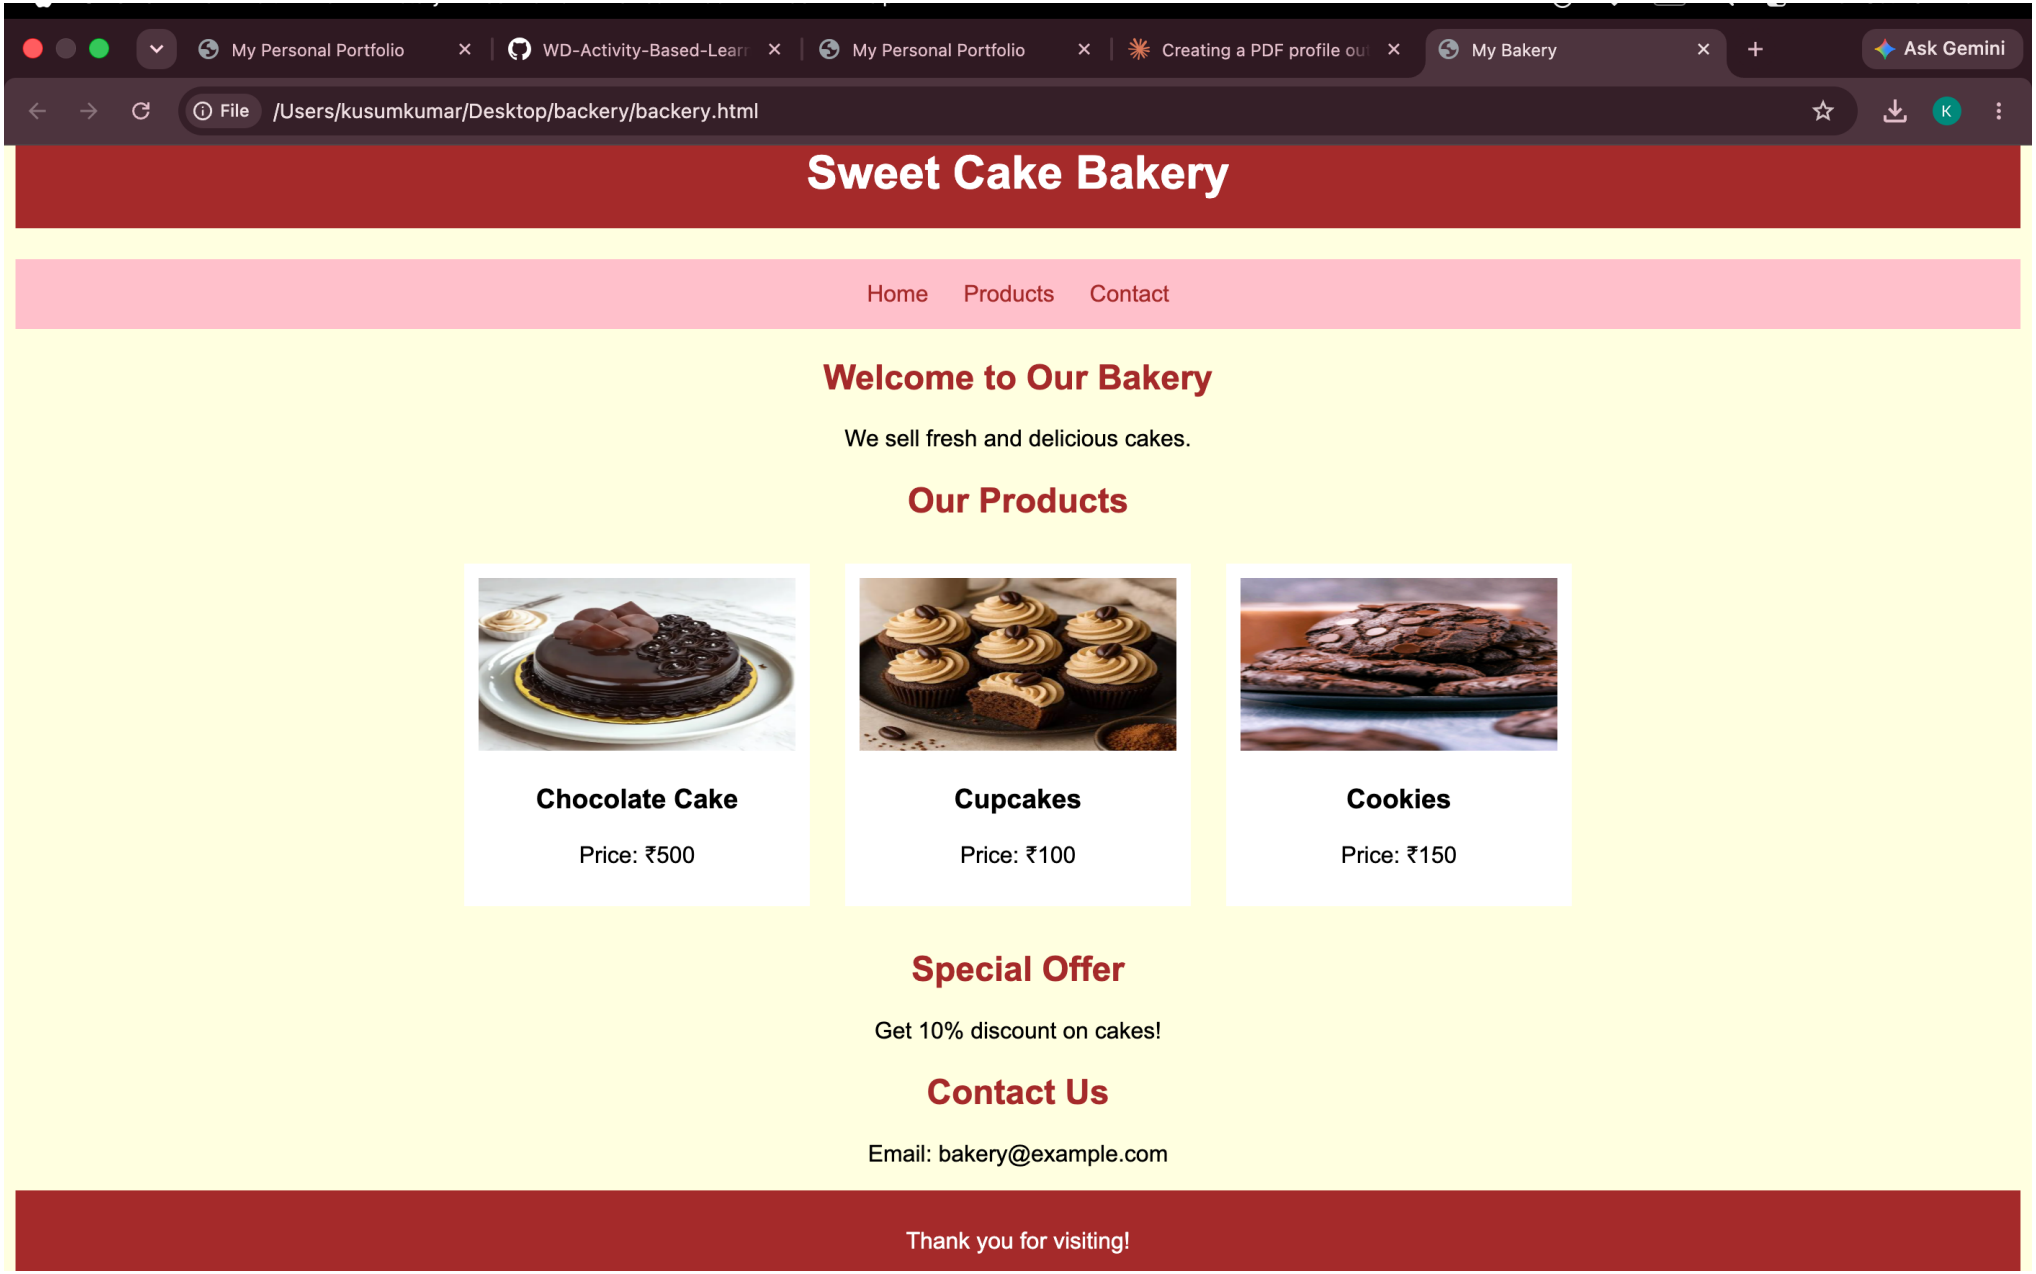

Features

- Welcome section: "We sell fresh and delicious cakes."
- Our Products: Chocolate Cake - Rs. 500, Cupcakes - Rs. 100, Cookies - Rs. 150
- Special Offer: 10% discount on cakes
- Contact Us: email address, and a "Thank you for visiting!" footer

Technologies Used

HTML (structure, images, navigation) and CSS (colours, card layout, spacing, alignment).

Test Case 2: Bakery and Cake Shop Website - Output

Test Case 3: Online Learning Platform Interface

Aim

To build the interface of an online learning platform where students can browse courses and enrol in them.

Description

A web page for "LearnHub" with the tagline "Your Journey to Knowledge Starts Here!". It has a purple header, a white navigation bar (Home, Courses, Contact), a course section with three cards, a contact section and a purple footer.

Features

- Course cards: Web Development (Instructor: Rahul, progress 50%), Python Programming (Instructor: Priya, progress 30%), Artificial Intelligence (Instructor: Anjali, progress 70%)
- Each card has an image, instructor name, short description, course progress and an "Enroll Now" button
- Contact Us section with email address and a footer: "Keep Learning!"

Technologies Used

HTML (structure, images, buttons, navigation) and CSS (card layout, colours, spacing, button styling).

Test Case 3: Online Learning Platform Interface - Output

My Personal Portfol | WD-Activity-Based | My Personal Portfo | Creating a PDF pro | My Bakery | Online Learning Pla | Ask Gemini

Conclusion

In this activity, three web pages were designed and tested: a Personal Portfolio Website, a Bakery and Cake Shop Website and an Online Learning Platform Interface. Each page was built with HTML for the structure and CSS for the styling, and the screenshots above show that every page displays correctly in the browser.

Through these test cases the following concepts were practised:

- Structuring pages with headings, paragraphs, images, lists, links and buttons
- Building navigation bars and a header and footer for each page
- Using CSS colours, borders, spacing and alignment to give each page its own look
- Arranging content in card layouts for the bakery products and the learning courses

Overall, the activity improved practical understanding of basic web development and showed how a clear layout and consistent styling make a web page easy to read and use.
